▶▶ Introduction

Overview

The HMG-448GEPT (extended temperature) and HMG-448GPT (standard temperature) are industrial full gigabit managed switches that comes with 4 x 10/100/1000Base-T(X) ports and 4 x 100/1000Base SFP ports that provide stable and reliable Ethernet transmission. This powerful switch uses **Made in the USA** CPU platform for maximum hardware product reliability.

In addition, the enhanced software features support a variety of Ethernet functions including STP/RSTP/MSTP/ ITU-T G.8032 ERPS and multiple Direct-Ring for redundant cabling, layer 2 Ethernet IGMP, VLAN, Quality of Service, ACL, Security, IPv6, bandwidth control, port mirroring, cable diagnostic and Green Ethernet. The HMG-448GEPT & HMG-448GPT are especially designed for harsh environments with rugged DIN-Rail metal enclosures to withstand applications where environmental conditions exceed normal product specifications. Ethernet Direct focuses on mission critical applications and these switches are suitable for industrial networking, security & surveillance, intelligent transportation systems (ITS), military & defense, building automation, factory automation, utility market applications and more. This switch supports standard operating temperature model (-10 to 60ºC) and extended operating temperature range models (-40 to 80ºC).
